Good morning Bruce,

I was wondering if you could confirm to Bradley Estates Community Association how many speed humps are planned to be installed on Renaud Road from Penency to Compass by Minto (Richcraft/Ashcroft??). We were told that there would be 4 (and one additional future speed hump at Compass). The latest information we have received from the Councillor is that only two are being installed this year and they will be installed between Penency and Glenlivet, which is not helpful at all for the elementary school crossing

The latest we have learned is:

“Two speed humps (3 m wide and 80 mm high) will be installed between Penency Terrace and Glenlivet Ave. by the Richcraft/Minto/Ashcroft development partnership as part of an agreement with the City of Ottawa. This work is anticipated for August 2019 and the locations were selected based on consultation with the community”

Hoping you can clarify.

Best regards,  
Yasmine Fathers  
(BECA, President)  
Julie Godward  
(BECA, VP)

**Jessica,**

I understand the residents will be disappointed however the repair needs to be done, Minto has indicated to me that they are eager to have the final lift installed first thing next year (weather permitting and when the asphalt plants open up).

As mentioned, Minto has submitted a proposal for some temporary measures to be implemented for this year (and possibly in the early spring) to our traffic group and awaits the go ahead and approval.

As for the repair required, that has not yet been decided but Minto will have to advise our group of what their plans are with all the particulars involved, including the timeframe.

Should you have further questions please contact me.

**Asad/Kunjan,**

Have you have a chance to review or comment on Minto's intial submission (from yesterday) for traffic calming on Renaud, keep in mind they will have their traffic engineer put something more formal together should their first submission be considered.

Thanks,

*Bruce Roberts*

Hi Bruce,

The community will be very disappointed that the long awaited final lift of asphalt and speed humps will not be installed as planned, by the beginning of this school year. The installation of temporary traffic calming measures by Minto is welcome

news, something must be done to address the community's concerns.

Our office expects to receive complaints from residents regarding this delay. We will do our best to reassure residents that the final lift will be installed in 2019 however ensuring proper servicing is also important. A proper explanation of the scope of work, responsibility for the work and why it must be completed will need to be provided to residents – our office is happy to assist in getting that information out to residents, the community association and the school community.

Thanks very much, have a lovely day
