

Brian Coburn Boulevard Extension and Cumberland Transitway Westerly Alternate Corridor Environmental Assessment Study Notice of Commencement and Open House #1

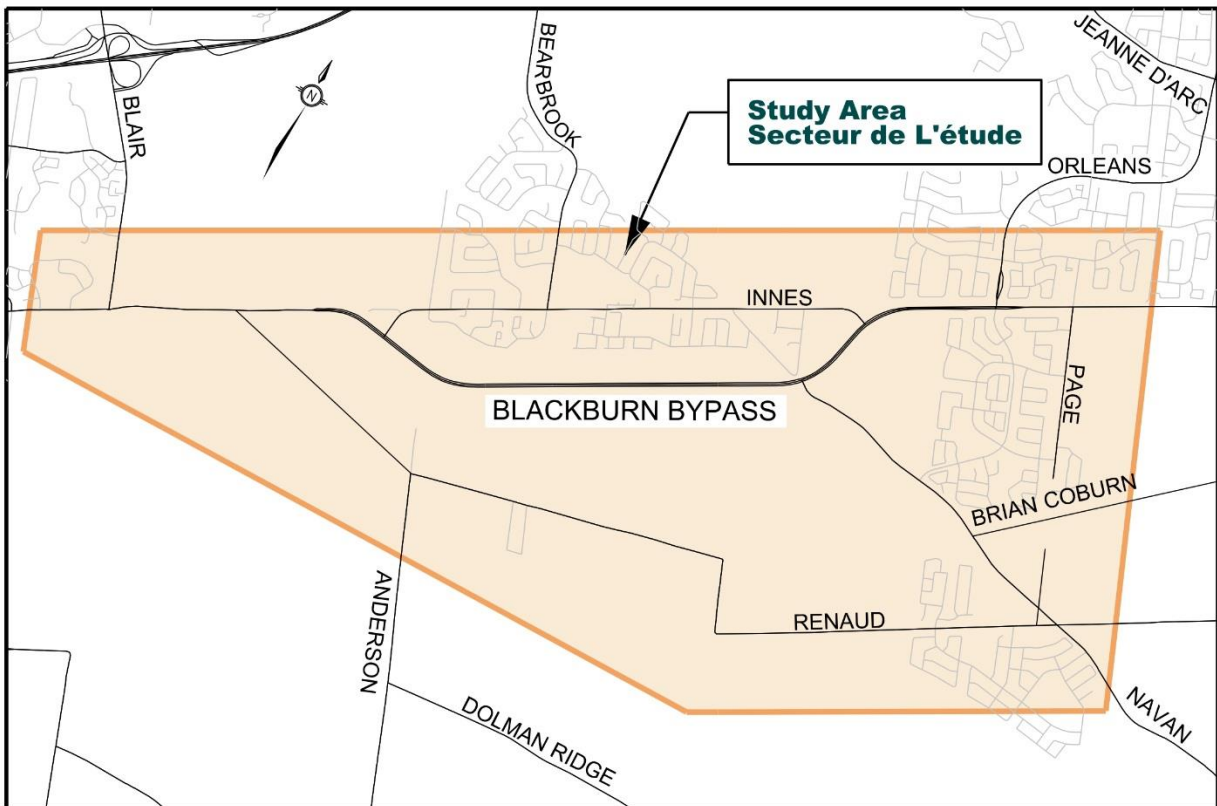

Date: Thursday May 17, 2018

Location: Rendez-vous des aînés francophones d'Ottawa, 3349 Navan Road, Orléans

Time: 6 to 9 p.m. (presentation at 7 p.m.)

Free parking is available

The City of Ottawa has initiated the Environmental Assessment (EA) study to develop an alternate plan for both the Brian Coburn Boulevard Extension and the Cumberland Transitway west of Navan Road. A recent geotechnical analysis concluded that the soil conditions in the area are very poor and it will be more costly than previously estimated to implement the previously approved 1999 EA Study Recommended Plans. As such, the City is in search of a more cost-effective solution.

The study is being undertaken in accordance with Schedule C of the Municipal Class EA, which is an approved process under the Ontario EA Act. The EA process will involve developing, assessing, and evaluating alternatives, leading to a Recommended Plan.

This Open House will provide information on:

- Study process and existing conditions
- Preliminary corridor options

Information about the study is available on the City's website at www.ottawa.ca/briancoburn and www.ottawa.ca/boulbriancoburn. Your participation is an important component of the study and interested persons are invited to provide comments throughout the EA process. Any comments received will be collected under the EA Act and with the exception of personal information, will become part of the public record.

Accessibility is an important consideration for the City of Ottawa. If you require special accommodation, please call 3-1-1 or email the project manager below before the event.
